

## MUNS FRONTEND SKILL SHEET

**Candidate Github Link : <https://github.com/FSfarhaan>**

SKILL	SELF GRADING OUT OF 5 ON THE TECHNOLOGY UNDERSTANDING AND IMPLEMENTATION	HANDS ON ( YES / NO )	Given an example of something you did in this ? ( you can repeat answers but share what you did exactly )
1 React Web App Development (Not Native)	5	Yes	Developed Front-end in react + vite and won a national hackathon, SIH 2024.
2 Flutter	0	No	
3.Functional/Object oriented programming	4	Yes	Developed Many android apps using Java, which uses OOP concepts.
4.Interacting with APIs for real time update of websites	5	Yes	We have participated in many hacakathons, where we developed such real time websites.
5 Bug fixing and finding	4	Yes	Participating in hacktoberfest since 2 years, where one solves problems and bugs in other people's code
6 Hands on with react native and open source communities	3	Not react native but open source	Raising PRs and solving issues of others during hacktoberfest.
7Javascript / Type Script / Clojure Script (ES6 + Syntax)	5	Yes	I am experienced in Javascript with ES6 + syntax. Currently I am learning typescript but I don't have any experience with Clojure Script.
8 Debugging third-party dependency conflicts	3	Yes	Kepler.gl, used for maps and all, uses redux and may not fully support React 18+. While React-redux requires react of version 18+ This caused a peer dependency conflict and I downgraded and upgraded some modules, which resolved the issue.
9. Webstorm	0	No	
10 Gradle	5	Yes	I build android apps using Java and Gradle is a default build tool in Android Studio.
11VScode	5	Yes	I build react / next apps in vs code only.
12 Understanding of REST APIs	5	Yes	I am experienced in MERN Stack which includes building backend and REST APIs using Node and Express.
13 Understanding of document request model	4	Yes	Worked on axios to make a request, connecting the backend.

14 Understanding of offline storage	5	Yes	In web, Local Storage, cookies, etc are used to store data locally. Mostly datas like jwt tokens, login time, etc is stored.
15 Experience with automated testing suites, like Jest or Mocha	0	No	
16 Any other information you want to share about technologies you know or other skills.	I am experienced in full stack development in MERN, although my strong part is Front-end. I use tailwind and Material UI to further enhance the styling. I have also learnt Next.js which helps me enhance my react development journey, enabling me to build more better and optimized websites.
